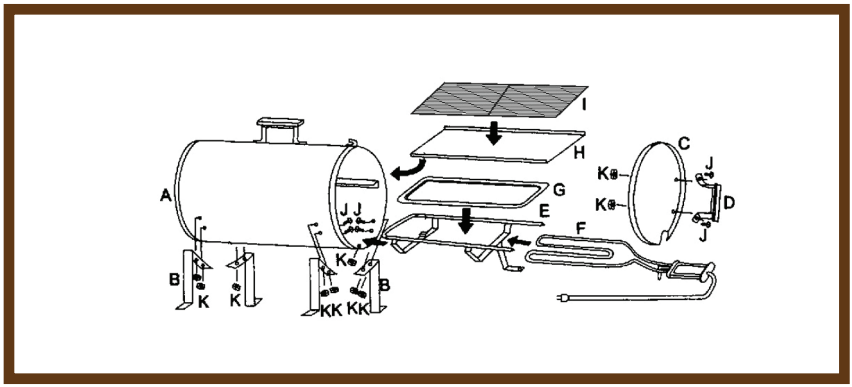
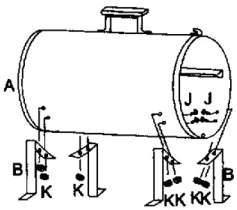
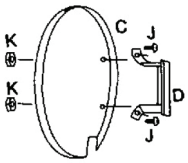
VÄINÖ SMOKER • HOW TO ASSEMBLE



For assembling Väinö Smoker you need a screwdriver and an appropriate pliers to tighten the screws and nuts.

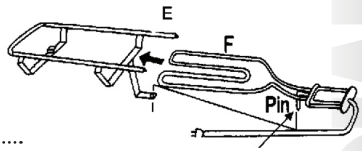
1. First, attach 4 legs to the body of the smoker.
   Each leg should be attached using 2 nuts and 2 screws

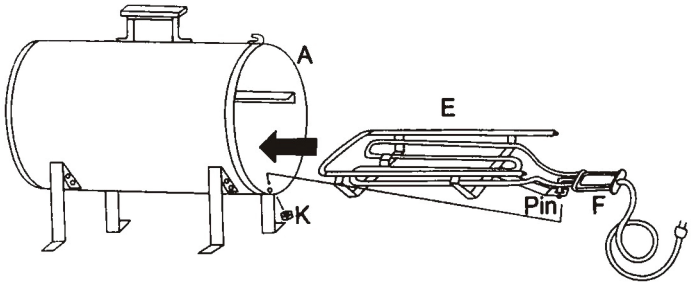




2. Attach handles to the smoker lid and to the smoker body.
   The handle with wooden insulation on the inner surface of the handle belongs to smoker lid. Attach both handles with 2 screws and 2 nuts.

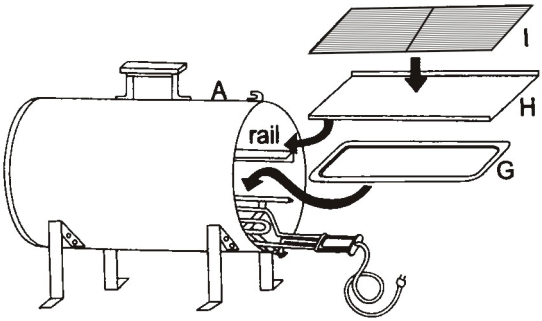
3. Place the heating element to the heating element frame by sliding it in. Fasten the hook by putting the hook in the hole on the heating element frame.



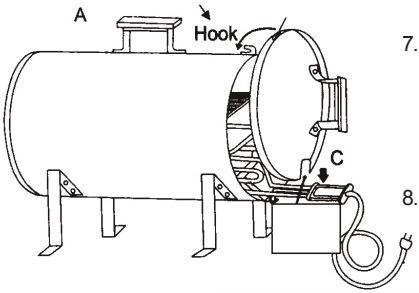


4. Install the heating unit into the smoker body. Attach the hook on the heating unit to the loop below the lid. Finally, lock the heating unit from outside by screw.

ELECTRIC SMOKER



5. Place the smoker pan on the cradle of the heating unit
6. Place the smoker grid on the top of the drip pan and slide in to smoker body using the rail inside.



7. How to attach the lid to the smoker body:
   - First, place the lid so that the cut on the lower side of the lid fits heating unit.
   - Attach the upper part of the lid to the hook on the top of the smoker body using the hole on upper side of the lid.
8. Smoker is now ready for use.
